SCOPE OF WORK

Reconnect and coordinate domestic cold water and fire plumbing lines at four NYCHA housing sites (Smith, Elliot, Lafayette, and Hughes Houses.)

PROJECT DESCRIPTION

A&J focused site surveys on all the incoming water plumbing lines that connected all the buildings on each of the four sites. The site plumbing lines were replaced and A&J's scope was to design and coordinate the reconnection of existing building domestic cold water and fire plumbing lines to the new site domestic cold water and fire plumbing lines.
