Topology of the Building 211 Honeywell System Upgrade

## SCOPE OF WORK

Installation and Operational Qualification for Honeywell Control System Modifications

## PROJECT DESCRIPTION

The Production Department implemented some modifications to the existing Honeywell Control System. A&J Consulting provided validation services for the installation and operational qualification of modified Honeywell Control System.

The modification to the Control System included the following:

- Addition of Differential Pressure monitoring between selected rooms.
- Alarming of UPS in 210/107 to the Honeywell Control System.
- Addition and alarming of Clean Steam Generator #3.
- WFI condenser.
- Air Compressor System
- Tie-in of six new DPR250 Honeywell Strip Chart Recorders to the Honeywell Control System.
